

ALGORHYTHM

A LIBRARY FOR ALGORITHMIC MUSIC COMPOSITION

Joris ten Tusscher, Cas van der Rest, Orestis Melkonian

April 5, 2018

Universiteit Utrecht

SOME DEFINITIONS

- **Melody:** Notes played in *sequence*
- **Chords/harmony:** Notes played *simultaneously*
- **Scale:** a sequence of ascending notes, beginning and starting on the same note.

i.e: C major = C, D, E, F, G, A, B, C

Or in intervals: 2, 2, 1, 2, 2, 2, 1

SOME DEFINITIONS

A piece of music is said to be in a **key** if it (primarily) uses notes from a certain scale

Diatonic music is music that uses scales that have the same pattern as we saw before (2,2,1,2,2,2,1).

MUSIC DSL: REPRESENTATION

Basically, you want to know when to make noise and when to remain silent.

Two pieces of music can be composed in parallel or sequentially.

```
type Duration = Rational
```

```
data Music a = Music a :+: Music a  
             | Music a :=: Music a  
             | Note Duration a  
             | Rest Duration
```

MUSIC DSL: REPRESENTATION

In order to provide export functionalities, we use a `MusicCore` type and a typeclass `ToMusicCore`.

```
type PitchClass = C | Cs | D ... As | B
type Octave = Oct0 | Oct1 ... Oct5 | Oct6
type PitchAttribute = Dynamic Dynamic
                    | Articulation Articulation
```

```
type MusicCore =
  Music ((PitchClass, Octave), [PitchAttribute])
```

This ensures that all the necessary information is there when exporting a piece of music

MUSIC DSL: REPRESENTATION

(Abstract) scales and chords are represented as intervals between notes, i.e:

```
major = [P1, M2, M3, P4, P5, M6, M7] -- Major scale  
d7b5 = [P1, M3, A4, Mi7] -- Half diminished chord
```

There are many constants for various scales and chords (, as well as common durations:

```
qn = 1%4
```

Music DSL: MANIPULATION

Music can be constructed and manipulated using various operators

```
-- quarter note C in the 4th octave, played softly
let n = (C#4 <: [PPP]) <| qn

-- A half note rest
let r = (hn~~)

-- Instantiate an abstract chord
let cMaj7 = ((C =| maj7) <#) 3 <|| wn
```

MUSIC DSL: MANIPULATION

A melody in our DSL:

```
line [ (C#6 <: [Dynamic PP]) <| wn
      , (D#6 <: [Dynamic MP]) <| wn
      , (hn~~)
      , (C#6 <: [Dynamic F_]) <| qn
      , (D#6 <: [Dynamic F_]) <| qn
      , (C#6 <: [Dynamic F_]) <| qn
      , (B#5 <: [Dynamic F_]) <| qn
      , (D#6 <: [Dynamic MF]) <| qn
      , (C#6 <: [Dynamic MP]) <| wn
      , (F#5 <: [Dynamic P ]) <| wn
      ]
```

MUSIC DSL: MANIPULATION

There's also some operators for common operations:

```
-- Transposition
```

```
C ~> M3 == E
```

```
-- Retrograded (mirroring)
```

```
let music' = (music><)
```

```
-- Time scaling
```

```
let music' = music *~ (1%5)
```

Also, **Music** is a functor!

```
^^Ilet rhythm = const () <$> music
```

FOCUS ON GENERATION, IGNORE ANALYSIS

YOU SHALL NOT PARSE!

genState, selectors, diatonic improv, etc...

- Chaos system: n start values, n update functions. f_x calculates x_{i+1} given x_i .
- Chaos: small difference in init values gives very different results.

CHAOS IN MUSIC: EXAMPLE

Table 1: $f_x = \max(-1) (\min 1 (1 - rx^2))$

r	1.9521	1.9621	0.25
x	1.2	1.18	1.18
x_0	-1.0	-1.0	0.8937
x_1	-0.9521	-0.9621	0.8002
x_2	-0.7695	-0.8161	0.8398
x_3	-0.1561	-0.3070	0.8236
x_4	0.9524	0.8149	0.8304
x_5	-0.7708	-0.3031	0.8276
x_6	-0.1598	0.8196	0.8287

CHAOS IN MUSIC: HARD TO GET RIGHT

Walker, Elaine. "Chaos melody theory." Music Technology New York University, Master's thesis (2001).

DYNAMIC PERFORMANCE: 1 (CLUSTER NOTES)

K-means

- x: absolute start time of note
- y: pitch, represented as integer
- k: total music time / beats per standard bar

DYNAMIC PERFORMANCE: 2 (MAP TO DYNAMICS)

1. Convert x (abs. time) and y (int pitch) to relative values per cluster in range $[0,1]$.
2. Call mapping function on every (x,y) pair
3. Convert mapping function result to dynamics
4. Add dynamics to note that (x,y) belongs to.

(Generative) *context-free grammars*, with a few extra features:

- **Temporal:** Rules are parametric to duration
- **Probabilistic:** Rules can be assigned weights
- **Graph:** Allow node sharing (using *let*-expressions)

GRAMMARS: DEFINITION

```
data Grammar meta a =  
  a | : [Rule meta a]  
data Rule meta a =  
  (a, Weight, Dur -> Bool) :-> (Dur -> Term meta a)  
data Term meta a =  
  a :%: Dur  
  | Term meta a :-: Term meta a  
  | Aux Bool meta (Term meta a)  
  | Let (Term meta a) (Term meta a -> Term meta a)  
  
(a, w) -| f = (a, w, f) :-> (a :%:)  
a | -> b = a :-> const b  
a | --> b = (a, 1, always) | -> b  
($:) = Aux False  
(|$:) = Aux True
```

GRAMMARS: GENERATION

```
gen :: (Eq a, Eq meta, Expand input meta a b)
    => Grammar meta a -> input -> Dur -> Music b
gen gr i t = rewrite gr t >>> unlet >>> expand i >>> toMusic
```

1. Given an initial duration, rewrite until fixpoint

```
rewrite :: (Eq a, Eq meta)
        => Grammar meta a -> Dur -> Term meta a
```

2. Unfold *let*-expressions

```
unlet (Let x f) = f x
unlet x         = x
```

3. Expand auxiliary wrappers

```
class Expand input meta a b | input meta a -> b where
    expand :: input -> Term meta a -> Term () b
```

4. Convert to music

```
(:~:) ~> (<|)
(:-:) ~> (:+:)
```

GRAMMARS: TABLA RHYTHM

```
tabla :: Grammar () Syllable
tabla = S | :
  [ S | --> TE1 :-: XI
  , XI | --> TA7 :-: XD
  , XD | --> TA8
  , XG | --> TB2 :-: XA
    ...
  , TE4 | --> Ti :-: Rest :-: Dha :-: Ti
  , TC2 | --> Tira :-: Kita
  , TB3 | --> Dha :-: Tira :-: Kita
  , TD1 | --> Rest
    ...
  ]
instance ToMusicCore Syllable where
  ...
```

GRAMMARS: TONAL HARMONY

```
harmony :: Grammar Modulation Degree
harmony = I | :
[ -- Turn-arounds
  (I, 8, (> wn)) :-> \t ->
    Let (I:%:t/2) (\x -> x :-: x)
  , (I, 6, (> hn) /\ (<= wn)) :-> \t ->
    II:%:t/4 :-: V:%:t/4 :-: I:%:t/2
  , (I, 2, (> hn) /\ (<= wn)) :-> \t ->
    V:%:t/2 :-: I:%:t/2
  , (I, 2) -| (<= wn)
  ...
  -- Modulations
  , (V, 5, (> hn)) :-> \t -> Modulation P5 $: I:%:t
  , (V, 3) -| always
  , (II, 2, (> hn)) :-> \t -> Modulation M2 |$: I:%:t
  , (II, 8) -| always
  ...
]
```

```
instance Expand Config Degree Modulation SemiChord where
  ...
```

```
voiceLead :: Music SemiChord -> IO (Music Chord)
```

GRAMMARS: JAZZ IMPROVISATION

```
melody :: Grammar () NT
melody = MQ | :

  rhy <- runGrammar tabla t
  writeToMidiFile "out.mid" (dyn (har == mel == rhy))
```

DEMO: MUSIC SCORE

Oriental Algebras for Metalophone, Sitar & Tablas

System 1 of the musical score, measures 1-3. It features three staves: a top staff with a treble clef and a key signature of one flat, a middle staff with a treble clef, and a bottom staff with a bass clef. The music is in 4/4 time. The top staff has a whole note chord in measure 1, followed by a half note in measure 2, and a quarter note in measure 3. The middle staff has a half note in measure 1, followed by a quarter note in measure 2, and a quarter note in measure 3. The bottom staff has a continuous eighth-note pattern throughout the three measures.

System 2 of the musical score, measures 4-6. It features three staves: a top staff with a treble clef and a key signature of one flat, a middle staff with a treble clef, and a bottom staff with a bass clef. The music is in 4/4 time. The top staff has a whole note chord in measure 4, followed by a half note in measure 5, and a quarter note in measure 6. The middle staff has a half note in measure 4, followed by a quarter note in measure 5, and a quarter note in measure 6. The bottom staff has a continuous eighth-note pattern throughout the three measures.

System 3 of the musical score, measures 7-9. It features three staves: a top staff with a treble clef and a key signature of one flat, a middle staff with a treble clef, and a bottom staff with a bass clef. The music is in 4/4 time. The top staff has a whole note chord in measure 7, followed by a half note in measure 8, and a quarter note in measure 9. The middle staff has a half note in measure 7, followed by a quarter note in measure 8, and a quarter note in measure 9. The bottom staff has a continuous eighth-note pattern throughout the three measures.

System 4 of the musical score, measures 10-12. It features three staves: a top staff with a treble clef and a key signature of one flat, a middle staff with a treble clef, and a bottom staff with a bass clef. The music is in 4/4 time. The top staff has a whole note chord in measure 10, followed by a half note in measure 11, and a quarter note in measure 12. The middle staff has a half note in measure 10, followed by a quarter note in measure 11, and a quarter note in measure 12. The bottom staff has a continuous eighth-note pattern throughout the three measures.

System 5 of the musical score, measures 13-15. It features three staves: a top staff with a treble clef and a key signature of one flat, a middle staff with a treble clef, and a bottom staff with a bass clef. The music is in 4/4 time. The top staff has a whole note chord in measure 13, followed by a half note in measure 14, and a quarter note in measure 15. The middle staff has a half note in measure 13, followed by a quarter note in measure 14, and a quarter note in measure 15. The bottom staff has a continuous eighth-note pattern throughout the three measures.

System 6 of the musical score, measures 16-18. It features three staves: a top staff with a treble clef and a key signature of one flat, a middle staff with a treble clef, and a bottom staff with a bass clef. The music is in 4/4 time. The top staff has a whole note chord in measure 16, followed by a half note in measure 17, and a quarter note in measure 18. The middle staff has a half note in measure 16, followed by a quarter note in measure 17, and a quarter note in measure 18. The bottom staff has a continuous eighth-note pattern throughout the three measures.
